

TECH-NOTE

MAPA Roof Hydrant

Since the early 2000s, MAPA has manufactured three versions of roof hydrants. Reps have asked for a visual to help identify which roof hydrant a customer has so they can order the proper replacement parts.

Q: How do I identify different MAPA Roof Hydrant versions to order the appropriate replacement parts?

A: Remove the dome handle and look at the valve stem, bonnet and nut from the top of the hydrant.
