

# SADDLEROLLER™ Series Support

## Features

- Includes base and roller
- Designed for gas, hydronic and conduit; roller allows for thermal expansion and contraction
- Accommodates up to 3" IPS
- Easy height adjustment – optional snap-on 2" Height Extender available
- Ships fully assembled
- 12 nested 2" Fixed Height supports banded for easy contactor transport; 48 units p/case
- Made in USA

## Overview

MAPA Products, SADDLEROLLER Series supports are manufactured as a 2" Fixed Height support; used with the height extender, will increase to 4".

Used within the recommended load limits, the SADDLEROLLER is designed as a free standing/non-penetrating pipe support stand for applications including natural gas, conduit and refrigeration.

SADDLEROLLER supports provide a price conscious alternative that is simple to install while saving time and labor on the project.

Molded vents prevent supports from migrating

Optional base pads available; standard or heavy duty walk pads

Simple installation, evenly space the supports within their load rating; for piping provide an additional support within two feet of each change in direction.

## Installation

## Engineering Specification Guide

Support for pipe, conduit, refrigeration lines shall be MAPA Products SADDLEROLLER Supports. Pipe support base shall combine UV protected 33% fiberglass reinforced 6/6 Nylon and Height Extender which securely attaches to the base to achieve a maximum height of 4" and is designed to allow for a "free-standing", "non-penetration" installation that may incorporate readily available accessories. Provide support with adhered isolation pad installed in accordance with the project manager or other designated roofing professional.

Designed and manufactured in compliance with the MSS SP-58 and MSS-69

### Advantages

- Made in the USA
- Includes base and roller
- Simple labor-saving installation, ready to use out of the box with no assembly needed.
